

# Money Supply Process

Economics 301: Money and Banking

# Goals and Learning Outcomes

1 / 16

- Goals:
  - Understand balance sheets of Federal Reserve system and banking system.
  - Understand how money is created and multiplied.
  - Understand determinants of money supply.
- Learning Outcomes:
  - LO4: Explain the structure of the Federal Reserve System and the mechanisms in which it controls the money supply.

# Goals and Learning Outcomes

1 / 16

- Goals:
  - Understand balance sheets of Federal Reserve system and banking system.
  - Understand how money is created and multiplied.
  - Understand determinants of money supply.
- Learning Outcomes:
  - LO4: Explain the structure of the Federal Reserve System and the mechanisms in which it controls the money supply.

# Reading

2 / 16

- Read Hubbard and O'Brien, Chapter 14.

# Federal Reserve Balance Sheet

## Federal Reserve System

Assets	Liabilities
Government securities	Currency in circulation
Discount loans	Reserves
Corporate securities	
Mortgage backed securities	

- Assets: securities purchased by the Federal Reserve.
- Reserves:
  - Banks have accounts at the Fed in which they hold deposits to be used to meet their own depositors needs.
  - Reserves = Deposits of banks at Fed + currency physically held by banks in vaults.

# Federal Reserve Balance Sheet

## Federal Reserve System

Assets	Liabilities
Government securities	Currency in circulation
Discount loans	Reserves
Corporate securities	
Mortgage backed securities	

- Assets: securities purchased by the Federal Reserve.
- Reserves:
  - Banks have accounts at the Fed in which they hold deposits to be used to meet their own depositors needs.
  - Reserves = Deposits of banks at Fed + currency physically held by banks in vaults.

# Federal Reserve Balance Sheet

Corporate securities	
Mortgage backed securities	

- Assets: securities purchased by the Federal Reserve.
- Reserves:
  - Banks have accounts at the Fed in which they hold deposits to be used to meet their own depositors needs.
  - Reserves = Deposits of banks at Fed + currency physically held by banks in vaults.

# Banking System Balance Sheet

## Banking System

Assets	Liabilities
Government securities	Checkable deposits
Personal/Corporate Loans	Other types of deposits
Loaned federal funds	Borrowed federal funds
Reserves	Discount Loans
Physical Collateral on Defaults	

# Open Market Operations

- Monetary base = currency in circulation + total reserves in banking system ( $MB=C+R$ ).
- Open market purchase of \$100 in Treasury Bills from Banking system.

## Banking System

Assets		Liabilities
Government Securities	-\$100	
Reserves	+\$100	

## Federal Reserve System

Assets		Liabilities
Government Securities	+\$100	Reserves +\$100

# Open Market Operations

- Monetary base = currency in circulation + total reserves in banking system ( $MB=C+R$ ).
- Open market purchase of \$100 in Treasury Bills from Banking system.

## Banking System

Assets		Liabilities
Government Securities	-\$100	
Reserves	+\$100	

## Federal Reserve System

Assets		Liabilities
Government Securities	+\$100	Reserves
		+\$100

# Open Market Operations

- Monetary base = currency in circulation + total reserves in banking system ( $MB=C+R$ ).
- Open market purchase of \$100 in Treasury Bills from Banking system.

## Banking System

Assets		Liabilities
Government Securities	-\$100	
Reserves	+\$100	

## Federal Reserve System

Assets		Liabilities
Government Securities	+\$100	Reserves +\$100

# Open Market Operations

- Monetary base = currency in circulation + total reserves in banking system ( $MB=C+R$ ).

## Banking System

Assets		Liabilities
Government Securities	-\$100	
Reserves	+\$100	

## Federal Reserve System

Assets		Liabilities
Government Securities	+\$100	Reserves +\$100

# Open Market Purchase from Public

- Open market purchase of \$100 from non-bank public.
- Suppose public deposits \$80 of proceeds in banks and holds \$20 currency.

## Non-bank Public

Assets		Liabilities
Government Securities	-\$100	
Checkable Deposits	+\$80	
Currency	+\$20	

# Open Market Purchase from Public

- Open market purchase of \$100 from non-bank public.
- Suppose public deposits \$80 of proceeds in banks and holds \$20 currency.

## Non-bank Public

Assets		Liabilities
Government Securities	-\$100	
Checkable Deposits	+\$80	
Currency	+\$20	

# Open Market Purchase from Public

- Open market purchase of \$100 from non-bank public.
- Suppose public deposits \$80 of proceeds in banks and holds \$20 currency.

## Non-bank Public

Assets		Liabilities
Government Securities	-\$100	
Checkable Deposits	+\$80	
Currency	+\$20	

# Open Market Purchase from Public (continued)

- Open market purchase of \$100 from non-bank public.
- Suppose public deposits \$80 of proceeds in banks and holds \$20 currency.

## Banking System

Assets		Liabilities	
Reserves	+\$80	Checkable Deposits	+\$80

## Federal Reserve System

Assets		Liabilities	
Government Securities	+\$100	Reserves	+\$80
		Currency in circulation	+\$20

# Open Market Purchase from Public (continued)

- Open market purchase of \$100 from non-bank public.
- Suppose public deposits \$80 of proceeds in banks and holds \$20 currency.

## Banking System

Assets		Liabilities	
Reserves	+\$80	Checkable Deposits	+\$80

## Federal Reserve System

Assets		Liabilities	
Government Securities	+\$100	Reserves	+\$80
		Currency in circulation	+\$20

# Open Market Purchase from Public (continued)

- Open market purchase of \$100 from non-bank public.
- Suppose public deposits \$80 of proceeds in banks and holds \$20 currency.

## Deposit Creation

9 / 16

- Suppose **required reserve ratio** is 5% and banks hold no excess reserves.
- Suppose Fed makes a \$100 open market purchase of bonds.
- Increases banks' reserves by \$100, they in turn loan full amount to non-bank public.
- Non-bank public borrows \$100 and spends it.
- \$100 expenditure becomes \$100 income for others in non-bank public.
- Suppose non-bank public holds zero currency, puts full amount in checkable deposits.

## Deposit Creation

9 / 16

- Suppose **required reserve ratio** is 5% and banks hold no excess reserves.
- Suppose Fed makes a \$100 open market purchase of bonds.
- Increases banks' reserves by \$100, they in turn loan full amount to non-bank public.
- Non-bank public borrows \$100 and spends it.

# Money Multiplier

11 / 16

- A single \$100 open market purchase of bonds created an increase of deposits equal to...

$$\Delta D = \$100 + 95 + 90.25 + 85.74 + \dots$$

- Let  $\Delta R$  denote initial change in reserves (\$100),  $r$  denote required reserve ratio.

$$\Delta D = \Delta R + (1 - r)\Delta R + (1 - r)^2\Delta R + (1 - r)^3\Delta R + \dots$$

- Can you simplify this expression? How much larger is change in deposits compared to open market purchase?

# Money Multiplier

11/ 16

# General Money Multiplier

13 / 16

- Suppose people do hold currency, banks hold excess reserves.
- Notation:
  - C: Currency holdings.
  - D: Deposits.
  - RR: Required reserves.
  - ER: Excess reserves.
  - R: Actual reserves.
  - MB: Monetary base.
- For simplicity, assume ratios of currency holdings and excess reserves are constant:
  - $c = C/D =$  currency ratio.
  - $e = ER/D =$  excess reserves ratio.
- Use  $MB = R+C$  and  $M1 = C+D$  to derive money multiplier.

# Determinants of Money Supply

14 / 16

- Monetary base is composed of,
  - Non-borrowed monetary base: reserves and currency that were not borrowed directly from Federal Reserve.
  - Borrowed reserves: reserves that were directly borrowed from Federal Reserve.
- Factors affecting money supply:
  - Open market operations (affect non-borrowed monetary base).
  - Changes in required reserve ratio.
  - Changes in banks desire to hold excess reserves.
  - Changes in consumers' desire to hold currency versus deposits.
  - Changes in borrowed reserves.

# Determinants of Money Supply

14 / 16
